Is this a "Fast & Focused" Search Request? (Circle One) YES ☒ NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC2100 and on the EIC2100 NPL Web Page at <http://ptoweb/patents/stic/stic-tc2100.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Is this request for a BOARD of APPEALS case? (Circle One) YES ☒ NOIs this case a SPECIAL CASE? (Circle One) YES ☒ NO

Please only the high-lighted part of claim #1:

"aggregating the second markup and the third markup to create a front page"

Note: It does not have to be "second markup" and "third markup". If you can find

"aggregating a markup and another markup to create a front page", that would be good enough.

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method for providing customizable client aware content aggregation and rendering in a portal server, comprising:

receiving a request, by the portal server, to provide a first channel of content and a second channel of content;

obtaining a first markup of the first channel of content and a second markup of the second channel of content, wherein the first markup is encoded in a generic markup language and the second markup is encoded in a device-specific markup language associated with an access device;

forwarding the first markup to a rendering engine to obtain a third markup of the first channel of content, wherein the third markup is encoded in the device-specific markup language;

aggregating the second markup and the third markup to create a front page; and
communicating the front page to the access device.

~~servieing a request for content using at least one of a plurality of channels;~~

~~accessing a first file path to service the request, the first file path pointing to generic non-customized information for a client device;~~

~~accessing a second of file path to service the request, the second file path pointing to customized information for the client device, wherein the second file path is accessed subsequent to the first file path;~~

~~processing aggregated content from a plurality of channels using a rendering engine, the rendering engine configured to output the aggregated content in a markup language tailored for the client device; and~~

~~outputting the aggregated content in the second markup language to the client device.~~
